Nebill domain model

Client
- address string
- company_name string
- department_name string
- key string * U
- memo text
- phone_number string
- zip_code string

Partner
- company_name string *

User
- current_login_at datetime
- failed_login_count integer *
- is_admin boolean *
- last_login_at datetime
- login_count integer *
- persistence_token string * U
- provider string U
- role integer *
- uid string

Employee
- actable_type string *
- email string * U
- name string

Member
- max_limit_time integer
- min_limit_time integer
- unit_price integer

Project
- amount integer *
- billing_address string *
- billing_company_name string *
- billing_department_name string *
- billing_memo text
- billing_personnel_names string *
- billing_zip_code string *
- contract_on date *
- contract_type string *
- contracted boolean *
- end_on date *
- is_using_ses boolean
- key string * U
- name string *
- orderer_address string *
- orderer_company_name string *
- orderer_department_name string *
- orderer_memo text
- orderer_personnel_names string *
- orderer_zip_code string *
- payment_type string *
- start_on date *

Bill
- acceptance_on date *
- amount integer *
- bill_on date
- delivery_on date *
- deposit_on date
- key string * U
- memo text
- payment_on date *

ProjectGroup
- name string *

ActiveRecord::SchemaMigration
- version string *

ProjectFileGroup
- name string *

ProjectFile
- file string *
- file_group_id integer
